

# Our Trust Values

Bradford District Care Foundation Trust is making pressure ulcer prevention a priority for everyone. This strategy will provide us with a shared focus for everything we do, in summary:

The plan gives us a shared focus - a framework - for everything we do.

Our framework covers what we all said was important to us and our long term goals to 2023. In summary:

- **Our purpose** (what we're here to do) - 'To create connected communities and help people to feel as healthy as they can be at every point in their lives'.
- **Our vision** (our long term goal) - 'To connect people to the best quality care, when and where they need it, and be a national role model as an employer'.
- **Our values** (how we'll do it) - 'We care, We listen, We deliver'.

**And why?** - we've summed this up in three words (our core statement); everything we do will focus on making 'better lives, together', and that goes for everyone, whether it's staff or the communities we serve.

## Our Pressure Ulcer Prevention Strategy

# Mission

What is our role for Nursing?

# Vision

What is our core purpose for Nursing?

# Strategic goals

How can the nursing workforce help to achieve our outcomes?

# Specific outcomes

We will demonstrate the achievements of the following outcomes through local action plans and governance groups.

Is to engage everyone in our belief that Pressure Ulcer Prevention is 'everyone's business'.

- We will do this by accessing research in the prevention and treatment of pressure ulcers. We will raise awareness of the importance of prevention and treatment and influence our pressure ulcer prevention education and policy to ensure that the highest standards of care are both accessible and delivered at all times.

Is to see the elimination of avoidable pressure ulcers that are acquired for patients under our care whilst supporting those self-caring to have the best possible outcomes.

**Healthy as possible**

### We will

- Ensure that the service we offer is tailored to the individual needs of each patient following full holistic assessment
- Enable an educated and informed nursing workforce with the right skills in the right place at the right time
- Develop a culture of innovation and system wide collaborative partnerships
- Enable our selfcare agenda and support service and partners to implement this

**Best Quality Services**

### We will

- Embed NICE Guidance ensuring all policies and protocols are meaningful and robust
- Undertake and respond to regular audits, service evaluations and quality assurance processes
- Respond to external (CQC) and internal (SI, complaints) feedback and adhering to regulations around quality and improvement of services
- Enhance the quality of our practice learning environments by listening and responding to the voice of our learners and implementing and evaluating a robust approach to educational audit
- Ensure that the services we offer are equitable to all our patients across BDCFT

**Best Place to Work**

### We will

- Be an inclusive and transparent workforce with processes in place that support speaking out
- Ensure that all staff have access to pressure ulcer prevention and treatment education to enable them to support the best possible outcomes for our patients at every stage of their journey
- Offer bespoke training and education to all teams/staff members/stakeholders when needed

**Seamless Access**

### We will

- Support our stakeholders with training and education to ensure that pressure ulcer prevention is a seamless process and strives to promote that this is 'everyone's business'
- Ensure our service is organised around the individual and provides person centred care enabling efficient and effective care delivery to the highest standards possible
- Seek to develop integrated care models and pathways to keep our patients and service users at the centre of all we do and strive to make every contact count
- Support our nursing workforce and stakeholders to seek out digital opportunities, maximise their learning and understanding to enable us to optimise the use of new technologies in support of pressure ulcer prevention strategies, training and education

**Measure Success**

### We will

- Carry out audit to ensure all outcomes are measured and achieved to the highest standard
- Implement data reporting process to analyse monthly Pressure ulcer and training data to ensure high standards of care remain at the heart of what we do
- Undertake regular Pressure Ulcer Meetings to ensure quality assurance is maintained and that we continue to deliver our patient promise by providing the best quality care we can
